Single column on all small devices

A hand-drawn sketch of a mobile form interface, designed for a single column layout on small devices. The interface is contained within a rounded rectangle representing a screen. At the top, there is a header area with the text "Add Something!". Below the header, there are four input fields, each preceded by a circular icon containing a stylized 'S'. At the bottom of the form area, there is a rectangular button labeled "SUBMIT" followed by a circular icon containing a stylized 'S'. The entire form is enclosed in a thin border, and there is a small circle at the very bottom center, likely representing a home button or a similar navigation element.
